

PROFESSIONAL SUMMARY

Java Software Engineer with hands-on experience designing scalable REST APIs, diagnosing complex application issues, and building fault-tolerant backend systems in large-scale enterprise environments. Proven track record in Spring Boot microservices, distributed database optimization, and Agile delivery within mission-critical automotive platforms. Passionate about solving ambiguous problems at scale and delivering high-quality software in fast-paced environments.

TECHNICAL SKILLS

- Languages: Java (Advanced), SQL, Python
- Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JUnit, ReactJS, REST APIs
- Tools & Platforms: Git, GitHub, Postman, IntelliJ, PostgreSQL, MySQL, Maven, Linux, Docker, Figma
- Certifications: Azure AI Engineer Associate, GitHub Actions, GitHub Foundations

EXPERIENCE

- **Java Software Engineer | Tata Consultancy Services**

September 2024 – Present

Stellantis Automotive Platform

- Diagnose and resolve complex Java application issues in a large-scale distributed automotive platform, ensuring optimal performance and meeting defined SLA timelines.
 - Build and optimize scalable REST APIs with improved database query performance, directly enhancing end-user experience for Stellantis clients across distributed infrastructure.
 - Develop robust solutions for recurring Spring Boot microservice failures, improving application stability; collaborate cross-functionally to architect fault-tolerant backend systems.
 - Manage deployments across dev and test environments using Maven; document technical solutions and create knowledge base articles to streamline future incident resolution.
- **Web Development Intern | Oasis Infobyte**

June 2023 – August 2023

- Built a full-stack web application with a team of four using HTML, CSS, PHP, and SQL; designed a REST API for seamless frontend-backend communication.
 - Utilized SQL for data management and PHP for server-side scripting, gaining foundational experience in scalable web application architecture.

PROJECTS

- **E-Commerce Platform Backend | Spring Boot, Spring Security, JUnit, Postman | Link**

Mar – May 2025

- Designed and built a scalable e-commerce backend using Spring Boot MVC; implemented role-based access control via Spring Security and validated APIs with JUnit and Postman.
- **Expense Tracker | Java, JSP, Servlets, JDBC, JSTL, JavaScript | Link**

Dec 2024 – Feb 2025

- Developed a full-stack expense management app using Java Servlets, JSP, and JDBC with dynamic content rendering and client-side input validation.
- **Fake Review Detection – BERT Transfer Learning | Python, BERT, BiLSTM | Link**

Jan – May 2024

- Built a BERT & BiLSTM classification model achieving 95% accuracy; published in IJRASET Vol. 12, Issue III, Mar 2024 (SJ Impact Factor: 7.538).
- **Travel Advisor | Node.js, HTML/CSS, Bootstrap, REST APIs | Link**

Aug – Dec 2023

- Built a real-time travel companion app integrating third-party APIs; improved user engagement by 25% through optimized data retrieval and a responsive interface.

EDUCATION

- **Pondicherry Technological University**

2020 – 2024

B.Tech in Information Technology

CGPA: 9.2 / 10.0
- **Aditya Junior College (BIEAP)**

2018 – 2020

HSC – Physics, Chemistry & Mathematics

CGPA: 9.6 / 10.0

PUBLICATION

Dr. Boobalan et al., “Fake Review Detection Using BERT Transfer Learning Algorithm,” *IJRASET*, Vol. 12, Issue III, Mar 2024. ISSN: 2321-9653, SJ Impact Factor: 7.538. [Link](#)

LEADERSHIP & EXTRA-CURRICULARS

- **TCS Class Representative:** Led communication and issue resolution for 100+ associates between the cohort and trainers during TCS onboarding training.
- **TechFest Organizer:** Organized intra-college TechFest at PTU managing 500+ participants; led a coordination team of four on schedules and resources.
